## **Turbo Acquisitions 10 Midco Limited**

### **Notes to the financial statements**

**For the period ended 31 December 2020**

---

#### **1 Accounting policies**

##### **Company information**

Turbo Acquisitions 10 Midco Limited is a private company limited by shares incorporated in England and Wales. The registered office is Unit 2, Mill End Road, High Wycombe, Buckinghamshire, HP12 4AX.

##### **1.1 Accounting convention**

These financial statements have been prepared in accordance with FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" ("FRS 102") and the requirements of the Companies Act 2006 as applicable to companies subject to the small companies regime. The disclosure requirements of section 1A of FRS 102 have been applied other than where additional disclosure is required to show a true and fair view.

The financial statements are prepared in GBP, which is the functional currency of the company. Monetary amounts in these financial statements are rounded to the nearest £.

The company has taken advantage of the exemption under section 400 of the Companies Act 2006 not to prepare consolidated accounts. The financial statements present information about the company as an individual entity and not about its group.

Turbo Acquisitions 10 Midco Limited is a wholly owned subsidiary of Turbo Acquisitions 10 Topco Limited and the results of Turbo Acquisitions 10 Midco Limited are included in the consolidated financial statements of Turbo Acquisitions 10 Topco Limited which are available from Unit 2, Mill End Road, High Wycombe, Buckinghamshire, HP12 4AX.

The financial statements have been prepared under the historical cost convention. The principal accounting policies adopted are set out below.

##### **1.2 Going concern**

As at 31 December 2020 the company had net liabilities of £7,614,041. The company has the strong support of the private equity fund which has invested in its strategy. On an ongoing basis, the directors prepare and update forecasts and monitor the cash position regularly. The directors are satisfied that, having reviewed the budgets and forecasts, ongoing shareholder support and available facilities, the company can meet its liabilities as they fall due for the foreseeable future. The company's immediate parent company Turbo Acquisitions 10 Topco Limited have provided a letter of support to confirm that it will not call in the amounts due by the company for a period of twelve months from the signing of the accounts. The directors are therefore of the opinion that it is appropriate to prepare these statements on a going concern basis.

##### **1.3 Reporting period**

The reporting period is from 1 April 2020 until 31 December 2020. The prior reporting period is from incorporation on 22 October 2019 to 31 March 2020.

**1 Accounting policies (continued)**

**1.4 Fixed asset investments**

Interests in subsidiaries are initially measured at cost and subsequently measured at cost less any accumulated impairment losses. The investments are assessed for impairment at each reporting date and any impairment losses or reversals of impairment losses are recognised immediately in the income statement.

**1.5 Financial instruments**

The company has elected to apply the provisions of Section 11 'Basic Financial Instruments' and Section 12 'Other Financial Instruments Issues' of FRS 102 to all of its financial instruments.

The company only enters into basic financial instrument transactions that result in the recognition of financial assets and liabilities like trade and other debtors and creditors, loans from banks and other third parties and investments in non-puttable ordinary shares.

Financial instruments are recognised in the company's statement of financial position when the company becomes party to the contractual provisions of the instrument.

Financial assets and liabilities are offset, with the net amounts presented in the financial statements, when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise the asset and settle the liability simultaneously.

***Basic financial assets***

Basic financial assets, which include debtors, are initially measured at transaction price including transaction costs and are subsequently carried at amortised cost using the effective interest method unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest. Financial assets classified as receivable within one year are not amortised.

***Classification of financial liabilities***

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.

***Basic financial liabilities***

Basic financial liabilities, including creditors, bank loans, loans from fellow group companies and preference shares that are classified as debt, are initially recognised at transaction price unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future payments discounted at a market rate of interest. Financial liabilities classified as payable within one year are not amortised.

Debt instruments are subsequently carried at amortised cost, using the effective interest rate method.

Finance acquisition and issue costs directly attributable to obtaining finance are capitalised as part of the financial instrument.

**1 Accounting policies (continued)**

**1.6 Interest receivable**

Interest income is recognised when it is probable that the economic benefits will flow to the company and the value of the interest income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and the effective interest rate applicable.

**1.7 Borrowing costs**

Interest costs are recognised in the income statement in the period in which they are incurred. Finance acquisition and issue costs are transferred to the income statement, where they are included within the interest charge incurred in respect of the associated borrowing, at a constant rate over the repayment period.

**1.8 Taxation**

Any tax expense arising represents the sum of the tax currently payable and deferred tax.

***Current tax***

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the reporting end date.

***Deferred tax***

Deferred tax liabilities are generally recognised for all timing differences and deferred tax assets are recognised to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Such assets and liabilities are not recognised if the timing difference arises from the initial recognition of other assets and liabilities in a transaction that affects neither the tax profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting end date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised.

Where items recognised in other comprehensive income or equity are chargeable to or deductible for tax purposes, the resulting current or deferred tax expense or income is presented in the same component of comprehensive income or equity as the transaction or other event that resulted in the tax expense or income.

**Notes to the financial statements (continued)**  
**For the period ended 31 December 2020**

---

**2 Critical accounting judgements and key sources of estimation uncertainty**

In the application of the company's accounting policies, the directors are required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised where the revision affects only that period, or in the period of the revision and future periods where the revision affects both current and future periods.

**Key sources of estimation uncertainty**

The estimates and assumptions which have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities are as follows.

***Amounts due to/from other group companies***

The directors review the recoverability of amounts, including Loan notes, due to/from other group companies with the directors of the relevant companies on a regular basis.

**3 Auditor's remuneration**

	Period ended 31 December 2020	Period ended 31 March 2020
Fees payable to the company's auditor and associates:	£	£
<b>For audit services</b>		
Audit of the financial statements of the company	2,750	2,750
	<u>          </u>	<u>          </u>

It has been arranged with subsidiary company, Grant & Stone Limited, that they meet the above audit fees of the company.

**4 Employees**

The company has no employees other than the directors, who did not receive any remuneration in respect of services to this company. Consequently, the average number of employees for the period is 0 (2020: 0).
