# Strategic report

---

## Introduction

The Directors present the Strategic Report of Greencoat GRI Assets Limited (the 'Company') for the year ended 31 December 2022. Details of the Directors who held office during the year and as at the date of this report are given on page 3.

## Structure

The Company is a private company, limited by shares and was incorporated under the laws of England and Wales on 2 September 2019.

## Principal activities

The Company is a wholly owned subsidiary of Greencoat Renewable Income LP (the 'LP' or 'GRI'), whose main purpose is to invest in, and manage renewable infrastructure assets located in the United Kingdom which produce and sell power over a long-term horizon.

The Company invests in Special Purpose Vehicles ('SPVs') which hold the underlying assets.

The Manager of the LP is Schroders Greencoat LLP (the 'Manager'), a Financial Conduct Authority regulated entity.

## Review of business

The Company's investments comprise an investment portfolio of subsidiary holdings measured at fair value with movements in fair value recognised in the Statement of Comprehensive Income in the period in which they arise.

During the year, the Company acquired a 100 per cent stake in Speyside Renewable Energy Partnership Limited ('Speyside') which owns a virgin wood-fired biomass power plant. As at 31 December 2022, Speyside was the only asset held by the Company.

During the year, portfolio generation was 11.2 per cent above budget at ca.73 GWh. Power prices during the year were well above budget, primarily reflecting high gas prices. The average N2EX Day Ahead auction price was £203.79/MWh. Overall, the operating profit of the underlying investment was up 261 per cent versus budget.

## Key performance indicators

The key metrics detailed in the Review of business section above and ESG section below provide information to assess how effectively the Company is meeting its objectives.

## Employees and Officers of the Company

The Company does not have any employees and therefore employee policies are not required. The Directors of the Company are listed on page 3.

## Corporate and social responsibility

### Environmental, Social and Governance matters

The Company invests in renewable infrastructure, the environmental benefits of renewable energy are widely known.

As outlined in the Governance section below, the Company relies on the Manager to apply appropriate environmental, social and governance policies. This includes responsibility for ESG matters before any investment and then continuously during the life of the renewable infrastructure asset. The Company's approach to responsible investing, including the environmental standards it aims to meet, are set out in the policies in place at the Manager.

Responsible investing principles have been applied to the investment in Speyside. These policies require the Company to make reasonable endeavours to procure the ongoing compliance of its investee company with its policies on responsible investment.

The Manager monitors compliance at the investment phase and reports on an ongoing basis to the Board.

## Task Force on Climate Related Financial Disclosures (TCFD)

The Company strives to maintain the highest standards of corporate governance and effective risk identification and management at both its level and asset level. The Company supports the recommendations of the TCFD and refers to them for guidance on addressing climate related risks and opportunities in order to enhance disclosures.

These disclosures are categorised between the four thematic areas, governance, strategy, risk management, and metrics and targets, as recommended by the TCFD.

### Governance

The Board is responsible for the determination of the Company's Investment Objective and Investment policy. It also oversees the management of the Company and its investment, including ESG and climate related risks and opportunities. The Board delegates the day-to-day management of the business, including management of ESG matters, to the Manager.

The Board and the Manager meet regularly and discuss risk management. Climate related risks are covered during these discussions, as they naturally arise from the Company's underlying investment and the Company's role in the decarbonisation of the UK economy. A formal risk matrix is maintained by the Manager and reviewed and approved by the Board on an annual basis.

In addition, the Manager has its own ESG Committee that meets regularly to discuss ESG and climate related risks relating to the Company and other funds it manages. This committee has implemented an ESG Framework Policy that looks to establish best practice in climate related risk management, reporting and transparency, which is updated annually.

### Strategy

As a company invested in operating UK renewable infrastructure, it plays a role in contributing towards the worldwide goal of achieving a net-zero carbon emissions economy. The Board and the Manager monitor climate related risks and appreciate their impact on the Company. In the medium and long term, more extreme weather patterns arising from global warming have the capacity to damage infrastructure in general, including above ground grid infrastructure. However, it is considered low risk that significant damage will be caused to generating equipment with this being considered during the acquisition process of any new potential investment. Nonetheless, appropriate insurance against property damage and business interruption is held for any such eventuality.

It is possible that the deployment of new renewable generating capacity, required to meet future UK and global emission reduction targets, could reduce the power price captured by the Company's investment. However, companies are increasingly required to demonstrate their adherence to reducing their carbon footprints and this may increase demand for corporate PPAs and could provide the Company with an option to fix power prices, should it decide to do so, and mitigate volatility.

Climate related risks can be classified into two broad categories: (i) risks associated with the transition to a decarbonised economy; and (ii) risks associated with the physical impacts of climate change.

### Transition Risks

#### *Policy and legal*

In the short, medium and long term scenarios, increased carbon and climate related regulation and disclosures demand more resource and associated compliance costs.

The Board also considers retrospective changes to the financial support of renewable energy as a potential risk in the medium to long term. Change of UK Government, or change in UK Government direction regarding renewable energy, could lead to future unfavourable renewable energy policies. Unfavourable renewable energy policies if applied retrospectively to current operating projects could adversely impact the market price for renewable energy or the green benefits earned from generating renewable energy, specifically ROCs, RHI, embedded benefits or carbon price floor.

The Board mitigates this risk by keeping itself abreast of developments in international support for renewable energy and will assess the impact of any changes and, where possible, respond to these changes when and if they happen. The UK has committed to the concept of grandfathering existing projects with subsidy support i.e., it cannot retrospectively change support.

## *Market*

The Board and the Manager continue to believe that the key factor that could impact the Company in the transition to a lower carbon economy is the variability of long term prices for wholesale electricity. In a lower carbon economy, where considerable build-out of renewable generation capacity will be required, there is a risk that the power price received by the Company's portfolio could be negatively impacted, depending on how successful the Government is in implementing its plan and depending on future electricity market design including the REMA consultation.

In a scenario in which global temperature increases are limited to only 1.5°C to 2°C (most typically associated with net zero), it is assumed that the Government is successful in implementing its plan in its entirety. In this scenario, the long term power price is lower than the base case used to calculate the Company's NAV. The lower long term power price reflects the wider deployment of low marginal cost renewable generation capacity, partially offset by the expected deployment of electrolyzers as part of a growing hydrogen economy, increased electrification of the transportation and heat sectors and the build-out of data centres. Modelling the lower long term power price would equate to a 7.9 per cent reduction in the NAV of Speyside.

The base case long term power price assumes significant renewable generation and other measures to reduce carbon emissions and represents the independent consultant's best estimate of likely outturn. The High Transition Risk Scenario assumes further measures. The precise effect on power price of any measures (in the base case and in the High Transition Risk Scenario) is highly uncertain and is highly dependent on future electricity market design. The High Transition Risk Scenario also assumes no other offsetting factors.

In the medium and long term there is a risk of competition for wood fibre and products in the forestry sector driving prices upwards, with impacts on the agriculture and food as well as the paper and wood industries.

## *Reputation*

The Board and the Manager expect renewable energy to only become more important in the transition to a net zero economy. Therefore, reputational risks are not considered material to the business. However, the Fund does understand its responsibility to disclose against regulatory ESG standards and failing to do so could carry reputational risk, over short, medium and long term scenarios.

## **Physical Risks**

Physical risks may consist of acute physical risk, which can refer to event driven perils including increased severity and frequency of extreme weather events, and chronic physical risk, which can refer to longer term shifts in climate patterns that cause sea level rise, heat waves, droughts, and desertification.

### *Acute*

The Board and the Manager continue to believe that a scenario where global temperature increases are significantly higher than 2°C would not lead to significant physical risk to the Company's renewable infrastructure asset which is designed to operate in extreme weather conditions and is not located in an area prone to flooding.

Alongside all scenarios, there is a risk that weather systems change as a result of higher temperature change scenarios, but it is not possible, at this time, to determine whether this would impact the Company positively or negatively.

## **Risk management**

As a full scope UK AIFM, the Manager has established a Risk Management Committee that meets on a quarterly basis to discuss, amongst other matters, the risk framework of the Company and its investee company including processes for identifying, assessing and managing climate related risks.

To ensure strong performance, the Company reinforces its specific oversight on environmental and social issues with a range of activities, including:

- appointing representation of at least one director from the Manager on the board of the investee company, to ensure monitoring and influence of both financial and ESG performance;
- carrying out due diligence to ensure that any new outsourced service providers are reputable and responsible organisations;
- carrying out due diligence during the acquisition process in accordance with the Manager's established procedures and ESG Framework Policy, and in compliance with the AIFMD Due Diligence Policy; and

- complying with all applicable anti-bribery and corruption, and anti-money laundering laws and regulations and implementing policies to ensure this performance is in line with the policies of the Manager.

The Manager's Investment Committee comprises experienced senior managers. Whilst making investment decisions, due consideration is given to climate related risks as well as to opportunities identified during due diligence.

During the procurement processes, environmental risks are considered, including flood risk assessments.

Given its long-term investment perspective, the Company regularly assesses the risks its asset might be exposed to and factors them into decision making and risk monitoring. These include for example, asset related technology changes, changes to government policy or support for renewable energy, and changes to market signals or pricing for gas and electricity. The risk registers consider climate risks, and the Manager ensures to keep these updated to keep abreast of any climate-related development. Following standard industry practice, the Manager assesses the likelihood and impact of risks on a numerical scale, to inform the actions it takes in mitigation.

In 2022, the Manager assessed a range of climate scenario modelling tools to find one most suitable to the assets it manages. During this assessment, each fund trialled at least one asset from each portfolio with a scenario modelling tool. All the assets assessed were analysed under RCP 2.6 and 8.5 scenarios using the time horizons: 2030, 2050, and 2100. The assets were analysed against eight extreme weather and climate change hazards: Riverine Flooding; Surface Water Flooding; Coastal Inundation; Forest Fires; Extreme Wind; Soil Movement; Freeze-Thaw and Extreme Heat events. The Manager recognises that these tools are continuously developing and will continue to move with the industry to keep abreast of new industry developments.

## Metrics

Renewable energy generators avoid carbon dioxide emissions on a net basis at a rate of approximately 0.4t CO<sub>2</sub> per MWh. This conversion factor may vary depending on geography. In 2022, the company avoided approximately 50,600 tonnes of CO<sub>2</sub> and generated enough renewable electricity to power approximately 36,300 homes.

The third party operations and maintenance ('O&M') service provider reports to the Manager's asset managers on a monthly basis on a standard set of KPIs and qualitative factors, such as health and safety compliance of O&M providers and compliance with relevant laws and regulations. These KPIs are disclosed annually in the Manager's ESG report. The Manager adopts a balanced and proportionate approach to the disclosure of ESG events to investors and, if appropriate, communicates significant incidents as they occur. Any material ESG incidents are communicated to the Company's Board, where it is assessed and decided whether to communicate to investors.

KPI data is sourced directly from the asset level companies and supplemented by specialist external advisers such as environmental consultants, as required.

The investee company's Scope 1, Scope 2 and Scope 3 greenhouse gas emissions are disclosed below.

	Year ended 31 December 2022	Year ended 31 December 2021
Scope 1 – Direct emissions (tonnes CO <sub>2</sub> )	6,631.0	-
Scope 2 – Indirect emissions (tonnes CO <sub>2</sub> )	-	-
Scope 3 – indirect emissions (tonnes CO <sub>2</sub> ) <sup>(1)</sup>	8,239.0	-
<b>Total Scope 1, 2 and 3 emissions (tonnes CO<sub>2</sub>)</b>	<b>14,870.0</b>	<b>-</b>

<sup>(1)</sup> Scope 3 emissions are the result of activities from assets not owned or controlled by the Company, but that the Company indirectly impacts in its value chain. Scope 3 emissions include all sources not within the Company's Scope 1 and 2 boundary.

Carbon footprint indicators are measured in line with the industry standard GHG Protocol based on an equity control approach, meaning emissions from the Company's operations are weighted according to the Company's ownership interest. Scope emissions calculations will be verified by third party consultants. The sustainability indicators are subject to an annual review to ensure that the Manager continues to improve transparency on ESG matters.

In 2022, Schroders Greencoat standardised the carbon footprints of the funds it manages by following a consistent methodology across all its funds, to ensure that figures are consistent going forward in net zero trajectories.

## Principal risks and uncertainties

The principal risks and uncertainties facing the Company and its investee company, and an explanation of how they are managed are set out below. The Board does not consider the likelihood or impact of these risks to have changed in the year.

### Manager

The ability of the Company to achieve its investment objective depends heavily on the experience of the management team within the Manager and more generally on the Manager's ability to attract and retain suitable staff. The sustained growth of the Company depends upon the ability of the Manager to identify, select and execute further investments which offer the potential for satisfactory returns.

### Regulation

If a change in Government renewable energy policy was applied retrospectively to current operating projects including Speyside, this could adversely impact the market price for renewable energy, or the value of the green benefits earned from generating renewable energy. The Government has evolved the regulatory framework for new projects being developed but has consistently stood behind the framework that supports operating projects as it understands the need to ensure investors can trust regulation.

### Financing risk

The Company has financed its investments through the issuance of loan notes of £48,304,502 (2021: £nil). The Company may finance new investments by issuing further loan notes or allotting additional shares to the LP. The Company has received confirmation from the LP that it will not demand redemption of the loan notes for at least 12 months from the date of approval of this report unless the Company has sufficient cash to finance its ongoing obligations.

### Electricity prices

Other things being equal, a decline in the market price of electricity would reduce the investee company's revenues.

### Feedstock prices

The price paid for feedstock is a key cost for Speyside, approximately 63 per cent of total operating expenses for 2023. Future cashflows have been modelled using a forecast of feedstock prices determined by independent market experts. A sustained increase in actual feedstock prices above these forecasts would have a negative impact on Speyside. Risks are mitigated through strict contracts with strong counterparties and a diverse supplier base.

### Availability and operating performance

The availability and operating performance of the equipment used by the renewable infrastructure asset may be impacted by accidents, mechanical failure, grid availability, theft or damage which will directly impact the revenues and profitability of the renewable infrastructure asset. The Company does not have any control over these risks, and accordingly, no provisions have been made for them. Failures may be the result of a short-term issue or a long-term fundamental failure of one piece of equipment, for example, which could impact returns.

All investments undergo significant due diligence prior to acquisition. Operations and maintenance agreements and asset management agreements are put in place to monitor the investment portfolio, which is overseen by the Manager. Insurance coverage is put in place for theft, damage and business interruption.

### Asset life

In the event that the renewable infrastructure asset does not operate for the period of time assumed or requires higher than expected maintenance expenditure to do so, it could have a material adverse effect on the financial performance and position of the investee company.

The Manager performs regular reviews and ensures that maintenance is performed at Speyside. Regular maintenance ensures that equipment is in good working order to meet its expected life span.

## Health and safety and the environment

The operation of Speyside is subject to health and safety and environmental regulation. A breach of these or an accident could lead to damages or compensation to the extent such loss is not covered by insurance policies, adverse publicity or reputational damage.

The Company engages an independent health and safety consultant to ensure the ongoing appropriateness of its health and safety policies and procedures. The investee companies have reporting lines ensuring that the Manager is informed of events as soon as possible after they occur.

## Going concern

A review of the going concern has not been included in this report as it is disclosed in the Directors' Report.

## Outlook

Bioenergy is a well-established technology area in the UK. It covers biomass, energy from waste and anaerobic digestion. It is a ca. £20 billion market of operating assets, with ca. £1.2 billion of capacity currently under construction. It is the Manager's view that approximately £0.5 billion of capacity will come online each year for the next 5 years.

Power prices during the year were well above budget, primarily reflecting high gas prices. The average N2EX Day Ahead auction price was £203.79/MWh. Forward power prices over the period 2023-2026 remain high. High power prices again drove strong cash generation in 2022 and the Company should continue to benefit from strong cash generation over the next few years through its balanced exposure to power prices.

High power prices have inevitably been considered by the Government in the context of balancing the country's fiscal position. The Manager has clarity in relation to the Electricity Generator Levy ('EGL'), which applies at a rate of 45 per cent of annual average power revenue above an index linked £75/MWh. ROCs, CFDs and FITs are excluded from the levy and the Company also benefits from a £10 million annual allowance. The levy applies from 1 January 2023 until 31 March 2028. The levy has been fully modelled and incorporated into the cash flow forecast that underlies the calculation of NAV.

The Government's Review of Electricity Market Arrangements ('REMA') continues, with a second round of consultation expected shortly. The aim of REMA is to accommodate a higher proportion of renewable generation and storage on the electricity network in line with the UK's target to decarbonise the electricity sector by 2035. The ultimate market design is thus expected to be supportive for the Company's asset and for further investment opportunities.

Two other key macro themes during the year were high inflation and rising interest rates. Discount rates have been increased reflecting higher interest rates. However, the effect of the increased discount rate has been more than offset by increased inflation given the index linked nature of the portfolio cash flows.

In general, the outlook for the Company is very encouraging, with proven operational and financial performance from Speyside.

## Directors' report

---

The Directors present their report, together with the financial statements of the Company for the year ended 31 December 2022.

### Directors

Details of the Directors who held office during the year and as at the date of this report are disclosed on page 3.

### Directors' indemnity

Directors' and Officers' liability insurance cover is in place in respect of the Directors. The Company's Articles of Association provide, subject to the provisions of UK legislation, an indemnity for Directors in respect of costs which they may incur relating to the defence of any proceedings brought against them arising out of their positions as Directors, in which they are acquitted or judgement is given in their favour by the Court.

Except for such indemnity provisions in the Company's Articles of Association, there are no qualifying third-party indemnity provisions in force.

### Risks and risk management

The Company is exposed to financial risks such as market risk, credit risk and liquidity risk, and the monitoring of these risks is detailed in note 15 to the financial statements and the strategic report.

### Independent auditor

Pursuant to section 487 of the Companies Act 2006, the auditor will be deemed to be reappointed and BDO LLP (the 'Auditor') will therefore continue in office.

### Statement of disclosure to auditor

So far as each of the Directors at the time that this report was approved are aware:

- There is no relevant audit information of which the Auditor is unaware; and
- They have taken all steps they ought to have taken to make themselves aware of any audit information and to establish that the Auditor is aware of that information.

### Financial statements

The Board is of the opinion that the financial statements, taken as a whole, are fair, balanced and understandable and provide the information necessary for the shareholder to assess the performance, strategy and business model of the Company.

### Other information

The Directors are responsible for the other information. The other information comprises the information included in the Annual Report, other than the financial statements and the auditor's report thereon.

### Results and dividends

The results for the year are set out in the Statement of Comprehensive Income on page 16. Revenue in the year ended 31 December 2022 was £23.2m (2021: £nil), of which £19.4m was attributable to the shareholder (2021: £nil). Strong revenue was driven by fair value movements of investments which were the result of high electricity prices and inflation.

Dividend payments made during the year amounted to £nil (2021: £nil). The Directors do not recommend the payment of any dividends for the year ended 31 December 2022.

### Going concern

At the 31 December 2022, the Company had net current assets of £1.6 million (2021: £nil), net assets of £19.4 million (2021: £1) and cash balances of £2.2 million (2021: £nil). The Company continues to meet its day-to-day liquidity requirements through its cash resources and the ongoing financial support provided by the LP. One of the key cash outflows of the Company is the payment of distributions, which is discretionary. As at 31 December 2022, the Company owed the LP £48.3 million in the form of loan notes (2021: £nil), as disclosed in note 9. The

Company has received confirmation from the LP that it will not demand redemption of the loan notes or seek repayment of interest on these loan notes for a period of at least 12 months from the date of approval of this report unless the Company has sufficient cash to finance its ongoing obligations. In addition, the LP will continue to provide ongoing support to the Company for a period of at least 12 months from the date of approval of this report.

The Company has no commitments to new investments as at 31 December 2022.

The Manager has considered the impact of the Government's windfall tax on UK electricity generators, including renewables. The tax applies to revenue earned on power prices in excess of £75 per MWh, which is higher than the prices that the underlying investment requires to generate cash surpluses. As a result of this, the Manager does not consider the windfall tax has created any material uncertainty over the assessment of the Company as a going concern.

The Manager has reviewed the Company's forecasts and projections taking into account foreseeable changes in investment and trading performance, as well as consideration to worse case outcomes, which show that the Company has sufficient financial resources to meet its current obligations as they fall due for a period of at least 12 months from the date of approval of this report.

On the basis of this review, and after making due enquiries, the Directors and the Manager have a reasonable expectation that the Company has adequate resources to continue in operational existence for at least 12 months from the date of approval of this report. Accordingly, they continue to adopt the going concern basis in preparing the financial statements.

## Likely future developments

The Directors expect the activity and performance of the Company's investee company to be satisfactory in the forthcoming year and are not aware of any potential circumstance that would adversely affect operations.

## Subsequent events

As disclosed in note 17, there were no other material subsequent events.

## Inclusion in the strategic report

In accordance with s414C(11) of the Companies Act 2006, the information relating to the principal activities of the Company, a business review and the principal risks and uncertainties of the Company have been included in the Strategic Report.

By order of the Board

 Minal Patel  
 Director  
 29 September 2023

## Directors' responsibilities statement

The Directors are responsible for preparing the Strategic Report, the Directors' Report, and the financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice ('UK GAAP') (United Kingdom Accounting Standards and applicable law), including FRS 102 - The Financial Reporting Standard applicable in the UK and Ireland. Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period.

In preparing these financial statements, the Directors are required to:

- Select suitable accounting policies and then apply them consistently;
- Make judgements and accounting estimates that are reasonable and prudent;
- State whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- Prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business; and
- Prepare a Directors' Report and a Strategic Report which comply with the requirements of the Companies Act 2006.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose the financial position of the Company with reasonable accuracy at any time and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors confirm to the best of their knowledge that:

- The financial statements, prepared in accordance with UK GAAP, give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company;
- The Directors' Report and the Strategic Report include a fair review of the development and performance of the Company and the position of the Company, together with a description of the principal risks and uncertainties it faces; and
- So far as each Director is aware, there is no relevant audit information of which the Company's Auditor is unaware, and each Director has taken all steps that they ought to have taken as a Director in order to make themselves aware of any relevant audit information and to establish that the Company's Auditor is aware of that information.

# Independent auditor's report to the members of Greencoat GRI Assets Limited

---

## Opinion on the financial statements

In our opinion the financial statements:

- give a true and fair view of the state of the Company's affairs as at 31 December 2022 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements of Greencoat GRI Assets Limited ('the Company') for the year ended 31 December 2022 which comprise the Statement of Comprehensive Income, Statement of Financial Position, Statement of Changes in Equity, Statement of Cash Flows and Notes to the Financial Statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland (United Kingdom Generally Accepted Accounting Practice).

## Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Independence

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

## Conclusions Relating to Going Concern

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least 12 months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

## Other Matter

The corresponding figures are unaudited.

## Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated.

If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

## Other Companies Act 2006 Reporting

In our opinion, based on the work undertaken in the course of the audit:

- The information given in the Strategic Report and the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- The Strategic Report and the Directors' Report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic report or the Directors' Report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- Adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- The financial statements are not in agreement with the accounting records and returns; or
- Certain disclosures of Directors' remuneration specified by law are not made; or
- We have not received all the information and explanations we require for our audit.

## Responsibilities of Directors

As explained more fully in the Directors' Responsibilities Statement, the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

## Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

### *Extent to which the audit was capable of detecting irregularities, including fraud.*

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below:

We gained an understanding of the legal and regulatory framework applicable to the Company and the industry in which it operates and considered the risk of acts by the Company which were contrary to applicable laws and regulations, including fraud. These included but were not limited to compliance with relevant laws and regulations and applicable accounting standards. We also addressed the risk of management override of internal controls, including testing journals and evaluating whether there was evidence of bias by the Manager, in particular around the key accounting estimate, being the valuation of the investment portfolio, that represented a risk of material misstatement due to fraud.

We focused on laws and regulations that could give rise to a material misstatement in the Company financial statements. Our tests included, but were not limited to:

- enquiries of management;
- review of minutes of board meetings throughout the period; and
- obtaining an understanding of the control environment in monitoring compliance with laws and regulations.

We communicated relevant identified laws and regulations and potential fraud risks to all engagement team members and discussed how and where these might occur and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

There are inherent limitations in the audit procedures described above and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we would become aware of it. As in all of our audits we also addressed the risk of management override of internal controls, including testing journals and evaluating whether there was evidence of bias by the Manager that represented a risk of material misstatement due to fraud.

Our audit procedures were designed to respond to risks of material misstatement in the financial statements, recognising that the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery, misrepresentations or through collusion. There are inherent limitations in the audit procedures performed and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we are to become aware of it.

A further description of our responsibilities is available on the Financial Reporting Council's website at: <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

## Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

# Notes to the financial statements

---

## 1. Accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied throughout the year.

### Basis of accounting

The financial statements of the Company have been prepared on the historical cost basis, as modified for the measurement of certain financial instruments at fair value through profit or loss, and in accordance with FRS 102 'The Financial Reporting Standard applicable in the UK and the Republic of Ireland' and the Companies Act 2006.

The preparation of these financial statements requires the use of estimates and assumptions that affect the amounts and disclosures in these financial statements. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 2.

### Accounting for subsidiaries

The Directors have concluded that the Company's subsidiary should be excluded from consolidation as the interest in the subsidiary is held as part of an investment portfolio as defined in paragraph 9.9 (b) of FRS 102 and are measured at fair value with movements in fair value recognised in the Statement of Comprehensive Income in the period in which they arise.

### Functional and presentational currency

The financial statements are presented in Sterling (£ or GBP) which is the Company's functional currency.

### Going concern

At the 31 December 2022, the Company had net current assets of £1.6 million (2021: £nil), net assets of £19.4 million (2021: £1) and cash balances of £2.2 million (2021: £nil). The Company continues to meet its day-to-day liquidity requirements through its cash resources and the ongoing financial support provided by the LP. One of the key cash outflows of the Company is the payment of distributions, which is discretionary. As at 31 December 2022, the Company owed the LP in the form of loan notes £48.3 million (2021: £nil), as disclosed in note 9. The Company has received confirmation from the LP that it will not demand redemption of the loan notes or seek repayment of interest on these loan notes for a period of at least 12 months from the date of approval of this report unless the Company has sufficient cash to finance its ongoing obligations. In addition, the LP will continue to provide ongoing support to the Company for a period of at least 12 months from the date of approval of this report.

The Company has no commitments to new investments as at 31 December 2022.

The Manager has considered the impact of the Government's windfall tax on UK electricity generators, including renewables. The tax applies to revenue earned on power prices in excess of £75 per MWh, which is higher than the prices that the underlying investment require to generate cash surpluses. As a result of this, the Manager does not consider the windfall tax has created any material uncertainty over the assessment of the Company as a going concern.

The Manager has reviewed the Company's forecasts and projections taking into account foreseeable changes in investment and trading performance, as well as consideration to worse case outcomes, which show that the Company has sufficient financial resources to meet its current obligations as they fall due for a period of at least 12 months from the date of approval of this report.

On the basis of this review, and after making due enquiries, the Directors and the Manager have a reasonable expectation that the Company has adequate resources to continue in operational existence for at least 12 months from the date of approval of this report. Accordingly, they continue to adopt the going concern basis in preparing the financial statements.

## Investment income

Dividend income is accounted for when the right to receive the dividend is established. Interest income on shareholder loan investments and other income are accounted for on an accruals basis using the effective interest rate method. Income in respect of the provision of management services to the SPVs is recognised on an accruals basis. Provisions are made against income where recovery is considered doubtful.

Gains or losses resulting from the movement in fair value of the Company's investment held at fair value through profit or loss are recognised in the Statement of Comprehensive income in the period in which they arise.

## Interest payable and expenses

Interest payable and expenses are accounted for on an accruals basis.

## Operating profit

Operating profit is stated after investment acquisition costs but before finance costs.

## Financial instruments

Financial assets and financial liabilities are recognised in the Company's Statement of Financial Position when the Company becomes a party to the contractual provisions of the instrument.

At 31 December 2022 and 2021 the carrying amounts of cash, receivables, payables, accrued expenses and short term borrowings reflected in the financial statements are initially measured at transaction price and subsequently held at amortised cost, less any impairment losses.

## Financial assets

Financial assets are recognised in the Company's Statement of Financial Position when the Company becomes a party to the contractual provisions of the instrument.

Financial assets are held at amortised cost or, in the case of investments in subsidiaries, at fair value through profit or loss.

## Amortised cost

Non-derivative financial assets with fixed or determinable repayments that are not quoted in an active market are classified as financial assets held at amortised cost. Debtors that are due within one year of the year end are recognised at the undiscounted amount receivable. All debtor balances are held at the undiscounted amount at 31 December 2022 and 31 December 2021.

## Fair value through profit or loss

Investments, including shareholder loans, are held at fair value through profit or loss upon initial recognition since they form part of an investment portfolio, the performance of which is measured and evaluated on a fair value basis. Gains or losses resulting from the movement in fair value are recognised in the Statement of Comprehensive Income in the period in which they arise. Fair value is defined as the amount for which an asset could be exchanged between knowledgeable willing parties in an arm's length transaction. Fair value is calculated on an unlevered, discounted cashflow basis.

## De-recognition of financial assets

A financial asset (in whole or in part) is derecognised either:

- When the Company has transferred substantially all the risks and rewards of ownership; or
- When it has neither transferred nor retained substantially all the risks and rewards and when it no longer has control over the assets or a portion of the asset; or
- When the contractual right to receive cashflows has expired.

**Financial liabilities**

Financial liabilities are classified according to the substance of contractual agreements entered into and are recorded on the date on which the Company becomes party to such contractual requirements of the financial liability.

All loans and borrowings are initially recognised at cost, being fair value of consideration received, net of any incurred transaction costs where applicable. After initial recognition, all interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate method. Loan balances as at the year-end have not been discounted to reflect amortised cost, as the amounts are not materially different from the outstanding balances. The Company's other financial liabilities measured at amortised cost include trade and other payables and other short-term monetary liabilities which are initially recognised at fair value and subsequently measured at amortised cost using the effective interest rate method.

**Derecognition of financial liabilities**

A financial liability (in whole or in part) is derecognised when the Company has extinguished its contractual obligations, it expires, or it is cancelled. Any gain or loss on derecognition is taken to the Statement of Comprehensive Income.

**Finance expenses**

Borrowing costs are recognised in the Statement of Comprehensive Income in the period to which they relate on an accruals basis.

**Share capital**

Financial instruments issued by a company are treated as equity if the holder has a residual interest in the net assets of that company. The Company's ordinary shares are classified as equity instruments.

**Cash at bank**

Cash at bank comprises cash balances held with banks, and is subject to an insignificant risk of changes in value.

**Taxation**

Tax for the year comprises current tax. Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous periods. Current tax is charged or credited to the Statement of Comprehensive Income.

A deferred tax asset has not been recognised as it is not considered probable that future taxable profit will be available against which it can be realised. A deferred tax liability has not been recognised in respect of unrealised gains/(losses) on investments held at fair value as these would be considered non-taxable or disallowable.

**2. Critical accounting estimates and judgements**

The preparation of financial statements requires the application of estimates and assumptions which may affect the results reported in the financial statements. Estimates, by their nature, are based on both judgement and information available at the time.

**Valuation of investments**

The estimates and assumptions that may have a significant impact on the carrying value of assets and liabilities are those used to determine the fair value of the investment. The fair value of the investment in Speyside is based on the discounted values of expected future cash flows, which are subject to certain key assumptions including the useful life of assets, the discount factors, the rate of inflation, the price at which the power and associated benefits can be sold, the amount of electricity and heat that the asset is expected to produce and the price and volume of feedstock.

Assumptions about useful lives of assets are based on the Manager's estimates of the period over which the asset will generate revenue. These assumptions are periodically reviewed for continued appropriateness. The actual useful life of the asset may be shorter or longer depending on the actual operating conditions experienced by this asset.

The discount factors are subjective. It is feasible that a reasonable alternative assumption could be used that would result in a different value. Discount rates are periodically reviewed taking into account any recent market transactions of a similar nature.

The revenues and expenditure of the asset are frequently partly or wholly subject to indexation, typically with reference to the Consumer Price Index (CPI) or Retail Price Index (RPI). From a financial modelling perspective, an assumption is usually made that the inflation index will increase at a long-term rate.

The price at which the output from the generating asset is sold is a factor of both wholesale electricity prices and the revenue received from the Government support regimes. Future power prices are estimated using external third-party forecasts which take the form of specialist consultancy reports, which reflect various factors including gas prices, carbon prices and renewables deployment, each of which reflect the UK and global response to climate change. The future power price assumptions are reviewed as and when these forecasts are updated. There is an inherent uncertainty in future wholesale electricity price projection.

The volume of electricity produced depends on the capacity factor of the power plant, which is a product of the generation capacity and the availability of the plant. The capacity factor is tested at the commencement of operations and the availability forecast is provided by specialist technical consultants. The volume of electricity produced per year is guaranteed by the operator of the plant as part of a long-term operation and maintenance contract. However, residual risks remain with the project owner such as in relation to unexpected breakdown of major items of equipment or non-supply of fuel.

Estimates and judgements are continually evaluated and are based on historical experience of the Manager and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Although the Manager uses its best judgement in estimating the fair value of investments, there are inherent limitations in any estimation techniques. Future events could also affect the estimates of fair value. The effect of such events on the estimates of fair value, including the ultimate liquidation of investments, could be material to the financial statements. The financial risk management objectives and policies of the Company, including exposure to price risk, interest rate risk, credit risk and liquidity risk are discussed in note 15 to the financial statements.

### 3. Income

	For the year ended 31 December 2022 £	For the year ended 31 December 2021 £ (Unaudited)
Investment interest income	2,505,676	-
Dividends	2,500,000	-
Management services income	31,095	-
	<b>5,036,771</b>	<b>-</b>

### 4. Operating profit

The operating profit is stated after:

	For the year ended 31 December 2022 £	For the year ended 31 December 2021 £ (Unaudited)
Auditor's remuneration for the audit of the financial statements	12,000	-

## 5. Taxation

	For the year ended 31 December 2022 £	For the year ended 31 December 2021 £ (Unaudited)
UK Corporation tax	-	-

The tax assessed for the year shown in the Statement of Comprehensive Income is lower than the standard rate of corporation tax of 19 per cent (2021: 19 per cent). The differences are explained below:

	For the year ended 31 December 2022 £	For the year ended 31 December 2021 £ (Unaudited)
Profit for the year before tax	19,423,054	-
Profit for the year multiplied by the standard rate of corporation tax of 19 per cent (2021: 19 per cent)	3,690,380	-
Income not taxable including unrealised movement on revaluation of investments	(3,926,471)	-
Expenses not deductible	222,388	-
Effects of group relief/other reliefs	13,703	-
<b>Total</b>	<b>-</b>	

The UK Government announced that the corporation tax rate will increase from 19 per cent to 25 per cent (for companies with profits over £250,000), from 1 April 2023.

## 6. Investments

	Loans £	Equity investments £	Total £
<b>Opening balance at 1 January 2022<sup>1</sup></b>	-	-	-
Additions	49,966,484	1	49,966,485
Loan interest capitalised	1,700,151	-	1,700,151
Repayment of shareholder loan investments	(3,694,475)	-	(3,694,475)
Unrealised movement in fair value of investments	-	18,165,635	18,165,635
<b>Closing balance at 31 December 2022</b>	<b>47,972,160</b>	<b>18,165,636</b>	<b>66,137,796</b>

<sup>1</sup>The Company had no investments as of 31 December 2021.

The investment in Speyside is carried at fair value. The investment comprises a combination of loans and equity into the investment vehicle which own the underlying asset, and the fair value movements above have been allocated to equity. At such point that the equity carrying value may be reduced to nil, further reductions will be allocated against loan investments.

## Fair value measurements

FRS 102 requires disclosure of fair value measurement by level. The level of fair value hierarchy within the financial assets or financial liabilities is determined on the basis of the lowest level input that is significant to the fair value measurement. Financial assets and financial liabilities are classified in their entirety into only one of the following three levels:

- Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 - inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3- inputs for assets or liabilities that are not based on observable market data (unobservable inputs).

The determination of what constitutes 'observable' requires judgement by the Company. The Company considers observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The only financial instrument held at fair value is the instrument held by the Company in the Speyside SPV, which is fair valued at each reporting date. The Company's investment has been classified within level 3 as the investment is not traded and contains unobservable inputs. Due to the nature of the investment, it is always expected to be classified as level 3. There have been no transfers between levels during the year ended 31 December 2022. Any transfers between the levels would be accounted for on the last day of each financial period.

## 7. Receivables

	As at 31 December 2022 £	As at 31 December 2021 £ (Unaudited)
Amounts due from Greencoat Renewable Income LP	1	1
Recoverable VAT	88,094	-
Other debtors	31,096	
	<b>119,191</b>	<b>1</b>

## 8. Payables

	As at 31 December 2022 £	As at 31 December 2021 £ (Unaudited)
Loan interest payable	717,737	-
Other creditors	12,000	-
	<b>729,737</b>	<b>-</b>

## 9. Loans and borrowings

	As at 31 December 2022 £	As at 31 December 2021 £ (Unaudited)
Opening balance	-	-
Loans drawn down in the year	51,400,000	-
Loans repaid in the year	(3,095,498)	-
<b>Closing balance</b>	<b>48,304,502</b>	-

As disclosed in note 12, the Company issued loan notes to the LP which are repayable on the termination date of 31 December 2036 and bear interest at a rate of 6.5 per cent per annum. Interest is payable quarterly, on 10 January, 10 April, 10 July and 10 October each year, and any unpaid interest is capitalised on these dates. As at 31 December 2022, the loan balance was £48,304,502 (2021: £nil) and loan interest outstanding was £717,737 (2021: £nil).

## 10. Share capital

Issued	Number of shares issued £	Share capital £	Share premium £	Total £
Opening balance – 1 January 2022	1	1	-	1
Issue of shares during the year	-	-	-	-
<b>Closing balance – 31 December 2022</b>	<b>1</b>	<b>1</b>	<b>-</b>	<b>1</b>

Receivables	7	119,191	-	119,191
Cash at bank		2,200,308	-	2,200,308
		<b>2,319,499</b>	<b>66,137,796</b>	<b>68,457,295</b>

The Company had no financial assets as at 31 December 2021, except for other receivable balance amounting to £1 measured at amortised cost.

	Note	Measured at amortised cost £	Measured at fair value £	Total £
<b>Financial liabilities as at 31 December 2022</b>				
Payables	8	729,737	-	729,737
		<b>729,737</b>	<b>-</b>	<b>729,737</b>

The Company had no financial liabilities as at 31 December 2021.

## 12. Related party transactions

During the year, the Company issued loan notes to its LP. The loan notes are repayable on or before 31 December 2036 and bear interest at a rate of 6.50 per cent per annum. Interest is payable quarterly, on 10 January, 10 April, 10 July and 10 October each year, and any unpaid interest is capitalised on these dates. Total interest charged during the year was £2,552,239 (2021: £nil) and total interest paid was £1,834,501 (2021: £nil) was paid. As at 31 December 2022, the loan balance was £48,304,502 (2021: £nil) and loan interest outstanding was £717,737 (2021: £nil).

During the year, the Company issued a loan to Speyside. The loan notes bears interest at a rate of 6.50 per cent per annum. Interest is payable quarterly, on 31 March, 30 June, 30 September, and 31 December each year, and any unpaid interest is capitalised on these dates. Total interest charged during the year was £2,505,676 (2021: £nil) and total interest paid was £805,525 (2021: £nil). As at 31 December 2022, the loan balance was £47,972,160 (2021: £nil) and loan interest outstanding was £nil (2021: £nil). Speyside paid dividends to the partnership totalling £2.5 million in the year (2021: £nil).

The Company has a Management Service Agreement with Speyside, for which it receives £40,000 per annum rising with RPI in relation to management services. During the year, an amount of £31,095 (2021: £nil) was earned by the Company in respect of this agreement. As at 31 December 2022 there was £31,095 receivable from Speyside (2021: £nil).

## 13. Unconsolidated subsidiaries

The Directors consider the following investee company to be a subsidiary of the Company. The Directors have concluded that this subsidiary should be excluded from consolidation as this interest in a subsidiary is held as part of an investment portfolio.

Company	Company number	Ownership interest as at 31 December 2022	Ownership interest as at 31 December 2021 (Unaudited)
Speyside Renewable Energy Partnership Limited	SC403396	100%	-

Increase in receivables		(119,191)	-
Increase in payables		12,000	-
<b>Net cash flows generated from operating activities</b>		<b>(1,303,208)</b>	-

## 15. Financial risk management

The Company's activities expose it to a variety of financial risks: market risk (including price risk, interest rate risk and foreign currency risk), credit risk and liquidity risk. An explanation of those risks is set out below.

### Price risk

Price risk is defined as the risk that the fair value of a financial instrument held by the Company will fluctuate. The investment is measured at fair value through profit or loss and is valued on an unlevered, discounted cashflow basis. Therefore, the value of the investment will be (amongst other risk factors, as per note 2) a function of the discounted value of expected cashflows and, as such, will vary with movements in interest rates and competition for such assets.

In relation to the investment in Speyside, sensitivity analysis indicates that a discount rate increase of 50bp yields a downward adjustment to the fair value of Speyside of £1.1 million. Conversely, a discount rate decrease of 50bp yields an upward adjustment to the fair value of Speyside of £1.1 million.

The discount factors are subjective and therefore it is feasible that a reasonable alternative assumption may be used resulting in a different valuation for these investments.

### Interest rate risks

Interest rate risk is the risk that the fair value or future cashflows of a financial instrument will fluctuate because of changes in market interest rates. The Board considers that the shareholder loan investments and shareholder loan payable do not carry any interest rate risk as they bear interest at a fixed rate, thereby mitigating the risks associated with the variability of cash flows arising from interest rate fluctuations.

### Foreign currency risk

Foreign currency risk is defined as the risk that the fair values of future cash flows will fluctuate because of changes in foreign exchange rates. The Company's financial assets and liabilities are denominated in GBP and substantially all of its revenues and expenses are in GBP. The Company is not considered to be materially exposed to foreign currency risk.

### Credit risk

Credit risk is the risk of loss due to the failure of a borrower or counterparty to fulfil its contractual obligations. The Company is exposed to credit risk in respect of shareholder loan investments, accrued shareholder loan interest, cash at bank and other receivables. The Company's credit risk exposure is minimised by dealing with financial institutions with investment grade credit ratings.

The Company has advanced loans to its investee company. The Board regularly reviews the future cashflows and valuations of the investee company to gain comfort as to the recoverability of the loans. These loans are intra-group, and because the loans are intra-group. No balances are past due or impaired. The maximum exposure as at 31 December 2022 was £47,972,160 (2021: £nil).

### **Liquidity risk**

Liquidity risk is the risk that the Company may not be able to meet a demand for cash or fund an obligation when due. The Manager and Board continuously monitor forecast and actual cash flows from operating, financing and investing activities. The Directors do not consider the liquidity risk to be material due to the limited working capital required to meet the day-to-day commitments of the Company. The Company has a loan liability to the LP that is repayable on demand, however, it has received a letter of support from the LP confirming that this will not be recalled for at least 12 months from the date of approval of this report.

## **16. Controlling party**

The LP holds 100 per cent of the shares of the Company and the LP is the immediate and ultimate parent of the Company. The LP was registered in Scotland on 13 August 2019 under the Limited Partnerships Act 1907 with registration number SL033932. The consolidated financial statements of the LP include the financial statements of the Company and the LP is the ultimate controlling entity that includes the Company in its consolidated financial statements. Consolidated financial statements are not publicly available.

## **17. Events after the end of the reporting period**

On 26 July 2023, the Company invested £75,000,000 into RSG Renewable Energy Limited (RSG).

On the same date, the Company issued further loan notes to its LP totalling £59,378,704. The loan notes are repayable on or before 31 December 2036 and bear interest at a rate of 6.50 per cent per annum. Interest is payable quarterly, on 10 January, 10 April, 10 July and 10 October each year, and any unpaid interest is capitalised on these dates.

On 22 July 2023, the Company issued a loan to RSG for £27,880,296. The loan notes bears interest at a rate of 6.67 per cent per annum. Interest is payable quarterly, on 31 March, 30 June, 30 September, and 31 December each year, and any unpaid interest is capitalised on these dates.

There were no other material subsequent events.
